VOLUME 64

1981

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY
(USSR ACADEMY OF SCIENCES)

PAGES
RUSSIAN/ENGLISH

Detailed analysis of F supergiants. I. Distribution of microturbulence and element abundances in the atmospheres of γ Cyg and α UMi. A. A. Boyarchuk and L. S. Lyubimkov.....	3	1
Spectrophotometric study of the lithium star ξ Boo A. A. A. Boyarchuk and I. Eglitis.....	13	11
Photoelectric studies of time variations of the line $\lambda 4254.35 \text{ \AA}$ (CrI) in the spectrum of the Ap-star α^2 CVn. V. M. Kuvshinov and S. I. Plachinda.....	25	24
Fast variability of the spectrum of the magnetic star 53 Cam. N. S. Polusukhina, K. K. Chuvaev, and V. P. Malanushenko.....	37	35
Variations in the light of HD 29697. P. F. Chugainov.....	51	46
Polarimetric observations of polar AN UMa. Yu. S. Efimov and N. M. Shakhovskoi.....	55	50
Photometric study of the short-period variability of Nova Cygni 1975 (V1500 Cyg) in the continuum. E. P. Pavlenko and V. V. Prokof'eva.....	67	62
The spectrum of gamma Cassiopeiae in September–November 1977 and in September–October 1979. T. S. Galkina.....	72	68
Spectroscopy of the existing binary V822 AqI. T. M. Rachkovskaya.....	81	76
Variability of 3C 273, OJ 287 and PKS 0735+17 in radio and optical emission. V. A. Efanov, I. G. Moiseev, N. S. Nesterov, and N. M. Shakhovskoi.....	91	87
Multicolor photometry of the galaxy Markaryan 141 – the component of a double system. L. P. Metik.....	98	94
Observations of radio sources with the RT-22 at CAO and the RT-14 at RHUT in the millimeter wavelength range. V. A. Efanov, I. G. Moiseev, N. S. Nesterov, M. Tiuri, and S. Urpo.....	103	99
Some features of the rotation of sunspots. S. I. Gopasyuk.....	108	104
Relationship between active regions on the sun. M. B. Ogir.....	118	112
Determination of the physical conditions in the continuous-emission grains. E. A. Baranovskii and A. N. Koval.....	127	119
160-min oscillations in the Earth's magnetosphere due to solar pulsations. B. M. Vladimirkii, V. P. Bobova, V. N. Repin, and V. K. Veretennikova.....	132	124
Radio brightness distribution on the solar disk. E. E. Dubov and L. S. Lyubimkov.....	140	132
Connection between radio-brightness variations on the sun and magnetic-field humps and flocculi during a solar-activity minimum. A. F. Bachurin, A. S. Dvoryashin, N. N. Eryushev, and L. I. Tsvetkov.....	152	144
High-precision system for measuring the time of arrival of ultrahigh-energy photons. V. G. Shitov and A. A. Stepanyan.....	162	155
Choice of an astatic system for controlling the dc motors for altazimuth mountings of γ -ray telescopes. V. G. Shitov.....	171	163
Expansion of the dynamic range of the data-gathering and measuring system of a 5-channel spectrophotometer. L. V. Granitskii, A. B. Bukach, and N. I. Bukach.....	180	172
Optical system for large telescopes. G. M. Popov and M. B. Popova.....	188	180
Relative distribution of efficiency over the surface of a blazed concave grating. V. K. Prokof'ev.....	198	189
