VOLUME 62

1980

	PAGES	
	RUSSIAN	ENGLISH
Absolute spectrophotometry of four supergiants. V. I. Burnashev.....	3	1
Polarization observations of R Coronae Borealis during its 1977 minimum. Yu. S. Efimov.....	17	11
Procedure for determination of sky-background brightness from data from "Galactica" experiment. A. M. Zvereva.....	27	19
A catalog of profiles and equivalent widths of the Ca II K line in the spectra of metallic stars. V. M. Dobrichev.....	34	25
Multicolor photometry of bright formations in the galaxy NGC 4303. N. B. Grigor'eva.....	39	29
Use of model atmospheres to investigate class B-G stars. L. S. Lyubimkov.....	44	33
Origin of anomalous Balmer decrements in the spectra of eruptive stars. V. P. Grinin.....	54	42
The Balmer decrement in moving star envelopes. V. P. Grinin and N. A. Katysheva.....	59	47
Hydrogen-line intensity ratios in moving media. V. P. Grinin and N. A. Katysheva.....	66	52
A model of the Crab Nebula. Emission spectrum and brightness distribution. A. A. Stepanyan.....	79	63
Results of observation of the X-ray source Cyg X-3 in the energy range $>10^{12}$ eV with the Tien Shan EAS Cerenkov flash recorder. D. B. Mukanov, N. M. Nesterova, A. A. Stepanyan and V. A. Fomin.....	98	80
Activity of the X-ray source Cyg X-3 at $\lambda = 1.35$ cm in 1975-1978. S. L. Domnin, V. A. Efanov, I. G. Moiseev and N. S. Nesterov.....	103	85
Certain results from studies of extragalactic radio sources in the microwave band. V. A. Efanov, I. G. Moiseev and N. S. Nesterov.....	108	89
Certain characteristics of the large-scale magnetic fields of the Sun. V. A. Kotov and N. N. Stepanyan.....	117	96
Changes in physical conditions in sunspots on the active region McMath 14943 from 12 through 19 September 1977. E. A. Baranovskii and N. N. Stepanyan.....	125	103
Relation between brightness variations of hydrogen flocculi in active regions on the sun. M. B. Ogir.....	131	108
Motion of sunspots and flare on 4 July 1974. A. N. Babin.....	142	116
Distribution of chromospheric flares with respect to sector boundaries of the interplanetary magnetic field extrapolated to the Sun. L. S. Levitskii.....	148	121
The formation of hydrogen lines in quiescent prominences. Ch. Tsovookhuu.....	154	126
Development of local radio sources and burst activity of the Sun at short centimeter wavelengths. A. F. Bachurin, A. S. Dvoryashin, N. N. Eryushev and L. I. Tsvetkov.....	166	137
The behavior of McMath Region 14822 at 13.5 mm. S. L. Domnin, E. V. Efanov, I. G. Moiseev and N. S. Nesterov.....	176	146
Two-mirror aberration-free systems with one mirror of known figure. G. M. Popov.....	183	152
Reflectance of Al + Al ₂ O ₃ -coated mirrors in spectral range 1700-10,000 Å as a function of Al ₂ O ₃ film thickness. S. V. Fedulov, V. A. Volosnov and G. S. Dyatlova.....	190	159
Automated system for processing radioastronomical information during observations based on the M-600 computer. S. L. Domnin, V. A. Efanov, V. A. Korsenskii, E. S. Korsenskaya, I. G. Moiseev, N. S. Nesterov and P. S. Nikitin.....	198	165
