VOLUME 67

1983

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY
(USSR ACADEMY OF SCIENCES)

PAGES
RUSSIAN/ENGLISH

A study of the Am star 68 Tau by the atmosphere-model method. L. S. Lyubimkov and I. S. Savanov.....	3	1
Determination of effective temperature, acceleration due to gravity, and metallic parameter for late stars from spectral energy distribu- tions. V. I. Burnashev.....	13	10
Spectral observations on the peculiar star CH Cyg in July-October 1980. T. S. Galkina.....	33	25
Variations in luminosity and Ca II emission in the dwarf G stars ξ Boo AB and HD 1835. P. F. Chugainov.....	42	33
TV photometry of Nova Cygni 1975 (V 1500 Cygni) in 1979-1980. E. P. Pavlenko.....	50	40
High-energy gamma-ray observations on the Crab nebula in the Tien Shan in 1979-1981. D. B. Mukanov.....	55	45
Differential-rotation variations in solar background magnetic fields. N. N. Stepanyan.....	59	50
Polarization of resonantly scattered radiation from internal sources. S. I. Gopasyuk and D. N. Rachkovskii.....	65	56
Rayleigh scattering in a plane-parallel medium. D. N. Rachkovskii.....	78	66
Balmer lines in solar flares. E. A. Baranovskii.....	84	72
Some results on low-frequency plasma turbulence in large chromospheric flares. A. N. Koval and E. A. Oks.....	90	78
Comparison of H_{α} activity with microwave bursts on 6 July 1974. A. N. Babin and L. G. Kartashova.....	102	90
160-Minute oscillations in the 13.5 mm circularly polarized radiation from the Sun. V. A. Efanov, V. A. Kotov, I. G. Moiseev, N. S. Nesterov, and A. B. Severnyi.....	111	98
Coherent oscillations in the radio emission from the quiet Sun: methods and results obtained in 1977-1980. L. I. Tsvetkov.....	118	104
The Sun's radio radius at wavelengths of 1.9, 2.5, and 3.5 cm. A. F. Bachurin.....	127	113
A study of concave astronomical mirrors by Hartmann's method. R. E. Gershberg, K. Ya. Limorenko, and V. I. Pronik.....	132	118
Fast four-mirror systems. E. G. Popov.....	158	141
Abstracts of papers read at the Conference on Current Methods of Raising the Performance of Astrophysical Light-Receiving Apparatus.....	165	147
