VOLUME 72

1985

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY
(USSR ACADEMY OF SCIENCES)

PAGES
RUSSIAN/ENGLISH

A study of the Kuwano-Honda peculiar object (PU Vul). Part 1. T. S. Belyakina, N. I. Bondar, R. E. Gershberg, Yu. S. Efimov, V. I. Krasnobabtsev, P. P. Petrov, V. Pirola, I. S. Savanov, K. K. Chuvaev, N. I. Shakhovskaya, N. M. Shakhovskoi, and V. I. Shenavrin.....	3	1
Changes in emission in the H_{α} and H_{β} lines for some Be stars: γ Cas, ζ Tau, and 66 Oph. T. S. Galkina.....	72	57
Variability in H_{α} emission at the luminosity peak for WW Vul. G. V. Zaitseva, A. E. Tarasov, and A. G. Shcherbakov.....	85	68
The atmospheres of pulsating variables of δ Sct type. Part 2. Spectrum analysis for 44 Tau and V644 Her. L. S. Lyubimkov and T. M. Rachkovskaya.....	89	73
A study of the atmosphere of the supergiant δ CMa (F8 Ia) and determina- tion of its evolutionary parameters. L. S. Lyubimkov and Z. A. Samedov.....	99	82
A model-atmosphere study of α Lyr and γ Gem. I. S. Savanov and A. M. Khalilov.....	106	89
Pulsation in the γ Cyg supergiant: the 8-day magnetic-field period. S. I. Plachinda and E. L. Chentsov.....	120	101
The spatial distribution of pulsars in the galaxy and the nature of the gamma sources. B. M. Vladimirkii.....	125	106
Pulsar magnetic fields. Yu. I. Neshpor.....	131	112
The 5007 [O III] line shape and the central gas cloud at the nucleus NGC 1068. V. I. Pronik.....	135	115
H_{α} line shape and linear polarization during the pulse phases of two so- lar flares. A. N. Babin and A. N. Koval.....	142	122
Solar-flare energy balances and plasma densities. E. A. Baranovskii...	154	132
Measuring solar magnetic fields outside spots from lines with various strengths. S. I. Gopasyuk.....	159	137
Evolution and large-scale current structures in an active region. S. I. Gopasyuk, B. Kalman, and V. A. Romanov.....	171	147
Fe I, Zr I, and Y I absorption lines and the magnetic-field distribution across a sunspot umbra. M. Dzh. Guseinov.....	184	158
Chemical composition effects on the stability of the Sun's natural grav- itational oscillations. A. G. Kosovichev and A. B. Severnyi.....	188	162
A possible relation between planetary distances and the 160-minute solar pulsation. V. A. Kotov and S. Koutchmy.....	199	171
An interpretation of the origin of the variable component of solar noise storms. Yu. F. Yurovskii.....	208	180
Lunar observations to refine the Sun's radio radius. A. F. Bachurin...	211	183
A device for measuring fluctuations in solar brightness based on an in- tegrated photocell matrix. L. V. Didkovskii.....	217	190
An intensity microphotometer based on an Iskra-1256 microcomputer. V. P. Malanushenko, A. G. Shcherbakov, and V. I. Shuteev.....	226	197
A readily adjusted two-lens compensator for checking concave astronomi- cal mirrors. V. V. Kuznetsov, G. M. Popov, and V. I. Pronik.....	231	202
