VOLUME 73

1985

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY  
(USSR ACADEMY OF SCIENCES)

PAGES  
RUSSIAN/ENGLISH

Solar limb whisker emission polarization. A. N. Babin and A. N. Koval.	3	1
Possible torsional oscillations in sunspots with a period of about 40 min. S. I. Gopasyuk.....	9	7
The effects of gravitational radiation on the solar 160-min pulsations. A. G. Kosivichev.....	15	13
Global solar oscillations observed from relative near-IR photospheric brightness fluctuations. V. A. Kotov, S. Koutchmy, E. V. Kononovich, N. N. Ryzhikova, and T. T. Tsap.....	26	24
A search for the 160-min period in sequences of solar X-ray bursts and chromospheric flares. V. A. Kotov, V. V. Kasinskii, L. S. Levitskii, and V. P. Fomin.....	43	40
Three-minute oscillations in the polarized radio emission from local radio sources on the Sun. Part 1. V. I. Abramenko and L. I. Tsvetkov.....	53	49
Magnetic fields and vertical movements in supergranules. T. T. Tsap and I. S. Laba.....	62	57
Spectral observations on the chromospheric fine structure in an active region. L. G. Kartashova.....	70	64
Pulsations in the radio emission from the Sun as a star at 10-cm wavelength with a period of 160 min. N. S. Nesterov and Yu. F. Yurovskii.....	75	69
The atmospheres of pulsating variables of $\delta$ Scuti type. Part 3. Spectrum analysis for the star 28 And. L. S. Lyubimkov and T. M. Rachkovskaya.....	82	76
A model-atmosphere study of three spectral-class A stars. I. S. Savanov.....	92	85
Spectrum of the symbiotic star CH Cygni in 1982. T. S. Galkina.....	101	93
Spectral observations on 112 Herculis (HD 174933). T. S. Galkina and N. Kh. Minikulov.....	111	100
Faint secondary standards in the R photometric system in the cluster NGC 188. V. G. Medvedev, E. P. Pavlenko, and V. V. Prokof'eva....	122	108
Optical-emission flare energy distribution for stars of UV Cet-type in open clusters and in the neighborhood of the Sun. S. A. Korotin and V. I. Krasnobabtsev.....	131	116
Luminosity variation analysis for object OJ 287. T. S. Doroshenko, Yu. S. Efimov, V. Yu. Terebizh, and N. M. Shakhovskii.....	143	127
Calibration radio sources in the millimeter wavelength range. I. G. Moiseev and N. S. Nesterov.....	154	137
Determining the intensity distribution and energy in a stellar image in the presence of aberrations. G. M. Popov and M. B. Popova.....	165	147
A computational algorithm for testing concave astronomical mirrors by Hartmann's method. I. V. Il'in.....	176	157
Systematic guidance errors for the 22-meter radio telescope. N. S. Nesterov.....	189	169
