VOLUME 77

1987

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY
(USSR ACADEMY OF SCIENCES)

PAGES
RUSSIAN/ENGLISH

H and K lines and infrared triplets of Ca II in flocculi. E. A. Baranovskii, A. Kuchera, and Z. A. Shcherbakova.....	1	3	1
An investigation of the linear polarization of whiskers. A. N. Babin and A. N. Koval.....		9	8
Torsional oscillations of sunspots. S. I. Gopasyuk and G. V. Lyamova.....		17	17
A model of a sunspot with a flare above it. E. A. Baranovskii and Z. A. Shcherbakova.....		25	26
On the nature of activation of chromospheric fibrils in rela- tion to flares. L. G. Kartashova.....		32	34
The rotation of the Sun and the rotation of its general mag- netic field. V. A. Kotov.....		39	42
The 160-minute period, internal rotation, and 11-year solar cycle: are they related? V. A. Kotov and L. S. Levitskii.....		51	56
On the possibility of rapid rotation of the solar core. V. A. Kotov and A. G. Kosovichev.....		72	80
The radio radius of the Sun at 2.25 cm in 1980-1984. A. F. Bachurin.....		79	88
Enhanced radio brightness of the polar regions of the Sun. I. G. Moiseev and N. S. Nesterov.....		83	93
Geophysical study of the Sun's 160-minute pulsations. V. P. Bobova.....		90	101
An investigation of the chemical composition and other param- eters of π Sgr as a binary system. L. S. Lyubimkov and Z. A. Samedov.....		97	109
Spectral observations of Gamma Cassiopeiae in 1985-1986. Analysis of H_{α} and H_{β} emission lines of hydrogen. T. S. Galkina.....		115	131
Spectral and kinematic evidence of complex structure in the nucleus of NGC 1275. V. I. Pronik.....		126	143
Results of AZT-11 photoelectric observations of the continuous and line spectra of the NGC 1275 nucleus. N. I. Merkulova and I. I. Pronik.....		135	152
An experiment in photoelectric observations of the spectral variability of Seyfert-galaxy nuclei at the AZT-11 tele- scope. II. Errors of measured radiation fluxes related to the position of NGC 1275 in the diaphragm. N. I. Merkulova, L. P. Metik, and I. I. Pronik.....		144	162

(continued)

The 160-minute period in extragalactic objects: the LMC (RR Lyr stars) and NGC 4151. V. A. Kotov and V. M. Lyutyi...	148	166
Periodogram of an observation series composed of fragments separated by arbitrary time intervals. B. A. Burnasheva and O. P. Gollandskii.....	157	177
Modulation transfer function of an ideal annular astronomical telescope. V. K. Prokof'ev.....	166	187
Fast four-spherical-mirror systems with external focus. G. M. Popov and M. B. Popova.....	172	193
Influence of gamma-telescope light-detector geometry on registered angular sizes of Cerenkov flashes. Yu. L. Zyskin.....	179	202
Transistor gating circuits for a gamma-telescope electric drive. V. G. Shitov.....	190	215

1	3	1	Hand K lines and infrared triplets of Ca II in Altair
8	9	2 E. A. Gerasimovskii, A. Kuznetsov, and E. A. Zhelezovskaya
17	17	3 An investigation of the linear polarization of whiskers
28	28	4 E. M. Sargin and A. N. Kovalev
34	34	5 Toroidal oscillations of anapoles. S. I. Gopasvayk and
42	39	6 D. V. L'vov
56	51	7 A model of a sunspot with a flame above it. E. A. Gerasimovskii
80	75	8 and E. A. Zhelezovskaya
88	78	9 On the nature of activation of chromospheric fibrils in rela-
93	83	10 tion to flares. L. G. Karapuzova
101	90	11 The rotation of the Sun and the rotation of its general mag-
109	97	12 netic field. V. A. Kotov
131	115	13 The 160-minute period, internal rotation, and 11-year solar
143	138	14 cycle: are they related? V. A. Kotov and
151	137	15 L. S. Levitskii
153	135	16 On the possibility of rapid rotation of the solar core.
154	134	17 V. A. Kotov and A. G. Kosovnikov
155	133	18 The radio radius of the Sun at 2.25 cm in 1980-1984
156	132	19 A. P. Bachurin
157	131	20 Enhanced radio brightness of the polar regions of the Sun.
158	130	21 I. G. Molisev and E. S. Nesterov
159	129	22 Geophysical study of the Sun's 160-minute pulsations.
160	128	23 V. P. Bobov
161	127	24 An investigation of the chemical composition and other param-
162	126	25 eters of a star as a binary system. L. S. Spudisikov and
163	125	26 E. A. Zhelezovskaya
164	124	27 Spectral observations of Gamma Cassiopeiae in 1985-1986
165	123	28 Analysis of H α and H δ emission lines of hydrogen
166	122	29 T. S. Galikina
167	121	30 Spectral and kinematic evidence of complex structure in the
168	120	31 nucleus of NGC 1275. V. I. Prorok
169	119	32 Results of AT-11 photometric observations of the continuous
170	118	33 and line spectra of the NGC 1275 nucleus.
171	117	34 N. I. Nekulova and I. I. Prorok
172	116	35 An experiment in photometric observations of the spectral
173	115	36 variability of Seyfert-galaxy nuclei at the AT-11 tele-
174	114	37 scope. II. Errors of measured radiation fluxes related
175	113	38 to the position of NGC 1275 in the diagram.
176	112	39 N. I. Nekulova, I. I. Prorok, and I. I. Prorok
