VOLUME 80

1988

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY (USSR ACADEMY OF SCIENCES)

	PAGES	
	RUSSIAN/ENGLISH	
Results of a study of the spectra of eight δ Sct pulsating variables. T. M. Rachkovskaya	3	1
Possible causes of deep depressions in the ultraviolet spectra of B and A stars. II. Stellar envelopes. A. M. Dzhafarli and L. S. Lyubimkov	18	16
A study of the atmosphere of the mercury-manganese star α And. L. S. Lyubimkov and N. S. Polosukhina	30	27
The spectral variability of the Be star ϕ Persei. T. S. Galkina	41	38
Stellar spectrophotometric standards. I. V. I. Burnashev	54	50
Interpretation of the amplitudes of the light variations of RW Aur and BY Dra. P. F. Chugainova and M. N. Lovkaya	63	59
Narrowband photometry of ν Sgr. V. I. Burnashev	69	65
A spectrophotometric investigation of the nuclear region of the Seyfert galaxy NGC 1275. III. L. P. Metik and I. I. Pronik	76	72
On the probable contribution of discrete sources to the total gamma luminosity of the galaxy. B. M. Vladimirkii	83	79
Variations of the orientation and intensity of the magnetic field and their role in the formation of current structures. V. I. Abramenko and S. I. Gopasyuk	89	85
Determination of electric currents from vertical component of magnetic field and H_{α} fibrils. V. I. Abramenko, S. I. Gopasyuk, and M. B. Ogir	97	93
Magnetic field compression energy above a bright region in the common penumbra of a sunspot group. M. Dzh. Guseinov	106	102
Determination of the linear polarization parameters of whiskers from monochromatic observations. A. N. Babin and A. N. Koval	110	106
Space-time analysis of the Sun's brightness oscillations. I. L. V. Didkovskii and V. A. Kotov	118	114
Periodic variations of the brightness of the Sun: experience in observations with a 1024-channel array. L. V. Didkovskii and V. A. Kotov	124	120
Observations of minute-range oscillations in the Sun's radioemission at 2.25 cm. L. I. Tsvetkov and T. N. Tarasova	130	126
Space-time structure of the slowly varying millimeter-band radioemission of the active Sun. S. Urpo, I. G. Moiseev, J. Hildebrandt, and A. Kruger	142	137
Possibility of formation of a burst component in solar noise storms due to radio-wave scattering in the corona. Yu. F. Yurovskii	146	141
Spatial structure of normal-mode solar oscillations. L. B. Gorkin and A. G. Kosovichev	157	151
