## BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY (RUSSIAN ACADEMY OF SCIENCES)

Україна  
НАУКОВО-ДОСЛІДНИЙ ІНСТИТУТ  
«КРИМСЬКА АСТРОФІЗИЧНА  
ОБСЕРВАТОРІЯ»  
БІБЛІОТЕКА

PAGES  
RUSSIAN/ENGLISH

Modeling the spectra of binary stars. I. Reproduction of the chemical anomalies of Am-stars. L. S. Lyubimkov .....	1	3	1
Carbon, nitrogen, and oxygen abundances in the atmosphere of the pulsating star $\nu$ Eri. T. M. Rachkovskaya .....		17	13
A study of the atmospheres of the A and B components of the $\xi$ Boo system. I. S. Savanov .....		25	21
Long-term variability of the Be star gamma cassiopeiae from observations in visible light. T. S. Galkina .....		32	27
The symbiotic eclipsing variable CI Cyg. UBRVI photometry in 1989. T. S. Belyakina .....		45	39
Photometric observations of the symbiotic variables Z And, AG Peg, and V443 Her in the 1980s. T. S. Belyakina .....		49	43
Five-color photometry of DQ Her in 1987-1989. The question of cyclic variability of O - C in cataclysmic systems. E. S. Dmitrienko .....		57	51
Analysis of photometric observations of the Ap star HD224801 (1987-1988). V. P. Malanushenko, N. S. Poloshukhina, and M. Tomova .....		63	56
Fast flares and light fluctuations of V 1285 Aql. P. F. Chugainov and M. N. Lovkaya .....		73	65
Ultraviolet observations of the magnetic Ap star $\beta$ CrB on the "Astron" astrophysical station. N. I. Merkulova and S. I. Plachinda .....		78	70
Ultraviolet line spectra of the central regions of normal galaxies from "Astron" astrophysical station observations. N. I. Merkulova, L. P. Metik, V. I. Pronik, and I. I. Pronik .....		83	76
Continuous spectra of the central regions of normal galaxies from observations aboard the "Astron" astrophysical station. N. I. Merkulova, L. P. Metik, V. I. Pronik, and I. I. Pronik .....		90	83
On the 160-minute variability of NGC 4151: a rebuttal. V. M. Lyutyi and V. A. Kotov .....		104	95
Very high energy gamma-photon fluxes from the Crab Nebula. A. A. Stepanyan ...		113	103
Two generations of pulsars: an attempt at classification. A. P. Kornienko and B. M. Vladimirkii .....		118	108
Electric currents in an undisturbed region on the Sun. V. I. Abramenko, S. I. Gopasyuk, and M. B. Ogir .....		128	117

(continued)

Motions of matter in arch filaments on the Sun's disk. L. G. Kartashova .....	137	124
Above-sunspot flares and magnetic fields. II. A. N. Babin and A. N. Koval .....	146	133
On the problem of the crossover effect in sunspot spectra. Crossover effect or transverse field? I. Recognition techniques. M. Dzh. Guseinov .....	152	139
Certain aspects of superposed-epoch processing of time series. D. N. Rachkovskii .....	159	145
Fast periodic fluctuations of the Sun's general magnetic field. V. A. Kotov, M. L. Demidov, V. M. Grigor'ev, V. I. Khaneichuk, and T. T. Tsap .....	163	149
Tropospheric fluctuations and millisecond structure of the solar radioemission in the 3-GHz band. Yu. F. Yurovskii .....	171	157
Apparatus and observing procedure for millisecond pulsations in the Sun's radioemission. Yu. F. Yurovskii .....	182	166
A broadband ribbed horn for the Cassegrain antenna of the Crimean astrophysical observatory RT-22 radiotelescope. L. I. Tsvetkov and M. M. Pozdnyakov .....	186	170
General properties of high-resolution spectra from spectrometers with echelle diffraction gratings. V. K. Prokof'ev .....	193	176
Achromatic Schmidt systems. G. M. Popov .....	200	183
An investigation of stepping drives based on DVSh motors in certain problems of astronomical instrumentation. A. B. Bukach and L. F. Zlotnikov .....	213	194

(continued)
