VOLUME 86

1992

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY (RUSSIAN ACADEMY OF SCIENCES)

Abundance of elements in the atmosphere of the hyades KO giant δ Tau. 1		
I. S. Savanov and M. E. Boyarchuk	3	1
Investigation of radial velocities of symbiotic system AG Peg. N. A. Tomov and M. T. Tomova	19	17
Photometric periods in system AG Peg. T. S. Belyakina and V. V. Prokof'eva	46	42
Three photometric periods of V1500 Cyg in 1977. E. P. Pavlenko	55	51
Simultaneous high-speed UBVRI photometry of RW Tri in 1985-1990. E. S. Dmitrienko	62	58
Optical dichroism of circumstellar dust and intrinsic polarization of WW Vul. A. V. Berdyugin, V. P. Grinin, and N. Kh. Minikulov	69	65
Some characteristics of quasar spectra. I. I. Pronik	96	91
Pulsations of active galactic nuclei and problem of antimatter in the universe. V. A. Kotov and V. M. Lyutyi	108	101
Electric currents in quiet and active regions on the Sun and their comparison. V. I. Abramenko, S. I. Gopasyuk, and M. B. Ogir	124	116
Dynamics of arch filament system in a developing active region. L. G. Kartashova	133	124
Flares on a spot and magnetic fields. III. A. N. Babin and A. N. Koval	145	136
Magnetic "flags". A. N. Babin and A. N. Koval	152	143
Some problems of plasma motion in a solar active region. S. I. Gopasyuk	158	149
Some characteristics of scattered light in spectroscopic observations of solar formations on reflecting telescopes. M. Dzh. Guseinov	161	152
Investigation of the vibration modes of the 22-m radio telescope structure and their effect on tracking fluctuation errors. A. G. Kislyakov, V. I. Nosov, M. M. Pozdnyakov, L. I. Tsvetkov, and G. I. Shevchenko	167	158
Hartmann test of concave mirrors. D. N. Rachkovskii	173	164
Large flat-field fast mirror systems. G. M. Popov	178	170
Formation of photometric UBV values by echelle spectrometers. V. K. Prokof'ev ..	187	179
Television spectrometer with viewing the slit on a video monitor. A. N. Abramenko	194	186
Use of an IBM PC XT computer in the data collection system on the solar tower telescope. L. V. Didkovskii and V. I. Khaneichuk	198	190
Use of CCD matrix in an adaptive telescope. P. I. Borzyak, L. V. Didkovskii, A. I. Dolgushin, N. V. Steshenko, and V. V. Sychev	203	194
