Possibility of electric field determination in flare loops based on X-ray observations. V. I. Abramenko, S. I. Gopasyuk, and M. B. Ogir	3	1
A general method for solving the problem of absorption line formation in a semiinfinite atmosphere with magnetic field and with resonance scattering. D. N. Rachkovskii	11	8
Investigations of the structure of the Sun's magnetic field outside active regions. S. I. Gopasyuk, L. B. Demkina, and T. N. Tarasova	26	23
A study of the structure and dynamics of the quasi-biennial cycle based on geophysical data. V. P. Bobova	34	31
Calculation of the interactions of 5-min solar oscillations with convective flows. K. V. Parchevskii	41	37
Spatial spectrum of the solar radiogranulation on wavelength 3.3 mm. A. G. Kislyakov, V. I. Nosov, and L. I. Tsvetkov	44	40
Millimeter emission spectra of outbursts and the local S-components. I. G. Moiseev, N. S. Nesterov, and P. S. Nikitin	51	47
Model atmosphere analysis of solar type stars: κ Cet. I. S. Savanov	60	55
Abundance of carbon, nitrogen, oxygen, and other elements in pulsating variables of Delta Scuti I.28 And type. T. M. Rachkovskaya	68	62
Emission variability in the spectra of some Be-stars: θ CrB, φ Per, ψ Per. T. S. Galkina	75	69
High-accuracy measurements of the effective magnetic field in single spectral lines. S. I. Plachinda, A. V. Yakushechkin, and S. G. Sergeev	91	83
Stellar spectrophotometric standards: II. V. I. Burnashev and S. S. Guziy	97	88
Polarimetric and photometric monitoring observations of several isolated Herbig Ae stars during the 1989-1990 season. A. V. Berdyugin	107	98
A method for simultaneous measurement of four Stokes parameters in bands UBVRT. A. V. Berdygin and N. M. Shakhovskoi	122	112
UBVRT photometry of NGC 4151 Seyfert galaxy nucleus in 1989-1990. N. I. Merkulova and L. P. Metik	135	123
Oscillations of active galactic nuclei with 160-minute period and the antimatter hypothesis. V. A. Kotov and V. M. Lyutyi	144	132
Temperature parameters of astronomical mirrors. G. M. Popov	152	139

(continued)

Choice of the parameter to control the quality of observation data for the
 GT-48 gamma telescope. B. M. Vladimirkii, Yu. L. Zyskin,
 A. P. Kornienko, Yu. I. Neshpor, A. A. Stepanian, V. P. Fomin,
 and V. G. Shitov

1	3	Possibility of electric field determination in flare loops based on X-ray observations. V. I. Abramovskii, S. I. Gerasimov, and M. B. Ogorodnikov
8	11	A general method for solving the problem of absorption line formation in a scattering atmosphere with magnetic field and with resonance scattering. D. N. Rakhovskii
23	28	Investigations of the structure of the Sun's magnetic field outside active regions. S. I. Gerasimov, L. B. Demina, and T. N. Tarasova
31	34	A study of the structure and dynamics of the quasi-biennial cycle based on geophysical data. V. P. Shchegolev
37	41	Calculation of the interaction of γ -axis solar oscillations with convective flow. K. V. Pavlovskii
43	44	Spectral spectrum of the solar radiogrammatism on wavelength 3.3 mm. A. G. Kiselev, V. I. Novozov, and I. I. Tsvetkov
47	51	Multifactor emission spectra of outbursts and the local S -component. I. G. Moiseev, N. S. Pustovarov, and P. S. Nikitina
52	60	Model atmosphere analysis of solar type stars. K. C. C. I. S. Savanov
65	68	Abundance of carbon, nitrogen, oxygen, and other elements in pulsating variables of Delta Scuti 128 And type. T. M. Rakhovskaya
70	75	Emission variability in the spectra of some Be stars: β CrA, γ CrA, δ CrA. T. S. Galina
83	91	High-accuracy measurements of the effective magnetic field in single spectral lines. S. I. Pechenkin, A. V. Yakushevich, and S. G. Sergeev
88	97	Stellar spectrophotometric standards. II. V. I. Burashev and S. S. Gulya
98	107	Polarimetric and photometric monitoring observations of several isolated Herbig Ae stars during the 1989-1990 season. A. V. Belyagin
112	122	A method for simultaneous measurement of four Stokes parameters in bands. U. V. A. V. Belyagin and M. M. Shakhovskoi
123	132	UBVR photometry of NGC 4151 spiral galaxy nucleus in 1989-1990. N. I. Matukhina and I. B. Moiseev
132	144	Oscillations of active galactic nuclei with 100-minute period and the saturation hypothesis. V. A. Kotov and V. M. Lyutyi
139	152	Temperature parameters of astronomical sources. G. M. Popov
