Proceedings of the Memorial Conference dedicated to the Centennial of Academician Grigorii Abramovich Shain (1892-1956)	3	1
A lifetime devoted to science. K. K. Chuvaev	5	4
The rotation of stars. I. M. Kopylov	14	11
Study of minor planets in the Crimea: from the Shains to the present. N. S. Chernykh	27	22
From Shain's fields and Parenago's plan to modern integrated approaches to investigation of the galaxy. I. G. Kolesnik	34	29
The magnetic field of the galaxy. N. G. Bochkarev	41	36
Study of the atmospheres of long-period variables – from Shain to the present. V. G. Gorbatskii	64	58
Carbon stars. A. K. Alksnis	69	62
Diffuse nebulae in our galaxy and others. V. I. Pronik	72	65
On the present state of the planetary-ring problem. N. N. Gor'kavi and T. A. Taikdakova	82	73
Studies of asteroid duplicity at the Crimean Astrophysical Observatory. V. V. Prokof'eva	93	83
The Shain reflecting telescope (ZTSh). R. E. Gershberg	97	87

Scientific Papers

Abundances of carbon, nitrogen, oxygen, and other elements in the atmospheres of δ Sct pulsating stars. III. V644 Her. T. M. Rachkovskaya	162	96
Absolute spectrophotometry of Nova Vulpeculae 1984 N1 (PW Vul). V. I. Burnashev	169	103
Variability of the nuclei of Seyfert galaxies NGC 1275 and NGC 4151: UBRVI observations rapid flareups on light curves of NGC 1275. N. I. Merkulova and L. P. Metik	178	112
Features of the AE-index spectrum in the 4-24 hour range. V. P. Bobova	195	126
Microdisplacement actuators for the adaptive telescope: piezoelectric or magnetostrictive? L. V. Didkovskii, P. I. Borzyak, A. I. Dolgushin, A. I. Elizarov, V. S. Sirant, N. V. Steshenko, and V. V. Sychev	201	131
An experiment in quasi-simultaneous photometry of stars in the guide channel of a television spectrometer. A. A. Shlyapnikov	211	140
