VOLUME 91

1995

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY

PAGES
RUSSIAN/ENGLISH

Some problems of solar-stellar physics. R. E. Gershberg	5	1
Some problems of the chemical composition of stellar atmospheres. L. S. Lyubimkov	24	17
Very-high-energy gamma-ray astronomy. Observations of gamma-ray photons by recording Cerenkov light flashes in the atmosphere. A. A. Stepanian	56	45
Design principles and description of the second-generation GT-48 gamma-ray telescope. B. M. Vladimirkii, Yu. L. Zyskin, A. P. Kornienko, Yu. I. Neshpor, A. A. Stepanian, V. P. Fomin, and V. G. Shitov	74	60
Methods of analyzing polarization observations. N. M. Shakhovskoi	106	86
General magnetic field of the Sun as a star. V. A. Kotov	124	102
Nature of flare energy release on the Sun and plasma diagnostics of solar flares. V. V. Zaitsev and A. V. Stepanov	144	119
Study of the effects of solar oscillations in geophysical data. V. P. Bobova	163	137
Effects of geomagnetic activity in biological phenomena and physicochemical processes according to laboratory observations. B. M. Vladimirkii	193	163
Progress in surface imaging. N. E. Piskunov and J. B. Rice	208	176
