## BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY

|   | PAGES   |             |
|---|---------|-------------|
|   | RUSSIAN | ENGLISH     |
| Fragments from recollections of my father. O. A. Severnaya . . . . .  | 5       | 1           |
| Recollections of Andrei Borisovich Severnyi. P. P. Dobronravın . . . . .  | 8       | 4           |
| Academician A. B. Severnyi and his contribution to modern astrophysics.<br>V. A. Kotov . . . . .  | 12      | 7           |
| Magnetic fields, electric currents, and flares in solar active regions<br>(magnetograph observations from the Crimea). S. I. Gopasyuk . . . . .                                 | 15      | 10          |
| The ideas of A. B. Severnyi and the contemporary physics of flares.<br>M. A. Livshits . . . . .   | 24      | 19          |
| Spectroscopic and monochromatic studies of a white flare of 15 June 1991.<br>A. N. Babin, A. N. Koval, and M. B. Ogir . . . . .   | 28      | 22          |
| Relative time shift of intensity variations in solar radio bursts at 2.5 and 2.85<br>GHz. Yu. F. Yurovskii . . . . .  | 34      | 27          |
| The problem of nuclear reactions in a solar flare region. E. I. Mogilevskii . . . . .   | 47      | 38          |
| Temporal variations of photospheric physical conditions before flares.<br>K. V. Alikaeva, N. N. Kondrashova, T. I. Redyuk, and E. G. Rudnikova . . . . .                        | 52      | 42          |
| On the sequence of manifestations of a photospheric subflare. K. V. Alikaeva,<br>E. A. Baranovskii, N. N. Kondrashova, T. I. Redyuk,<br>and E. G. Rudnikova . . . . .           | 57      | 47          |
| Comparison of magnetic-field structures observed in FeI $\lambda 5250$ and $\lambda 5324 \text{ \AA}$<br>outside of active regions. S. I. Gopasyuk and T. N. Tarasova . . . . . | 63      | 53          |
| On the mechanism of millimeter-band emission from solar active regions and<br>bursts. N. S. Nesterov, I. G. Moiseev, P. S. Nikitin,<br>and I. D. Strepka . . . . .              | 66      | 56          |
| H $_{\alpha}$ -Invisible absorption structures of active regions on the Sun's disk in the<br>D $_3$ line of helium. E. S. Kulagin . . . . .                                     | 70      | 60          |
| Cyclic variations of large-scale solar magnetic fields. V. N. Obridko . . . . .   | 78      | 67          |
| The large-scale structure of the photospheric and coronal magnetic fields,<br>and its variations during an 11-year solar cycle. E. V. Ivanov . . . . .                          | 80      | 68          |
| The periodicity of the Sun's general magnetic field, 1968-1991.<br>V. I. Khaneichuk . . . . .   | 84      | 71          |
| The inverse problem of magnetic-field structure in the chromosphere and<br>corona. B. P. Filippov . . . . .   | 90      | 77          |
|   |         | (continued) |

|   |     |     |
|---|-----|-----|
| Ejection of magnetic fields from the convection zone of the solar atmosphere.<br>V. A. Romanov, D. V. Romanov, K. V. Romanov, V. S. Sokolov,<br>and L. V. Granitskii . . . . .                          | 98  | 84  |
| The standard solar model: influence of opacity and hydrogen distribution.<br>S. V. Ayukov and V. A. Baturin . . . . .   | 104 | 89  |
| Acoustic oscillations of the envelopes of the Sun. V. A. Baturin,<br>E. V. Kononovich, and I. V. Mironova . . . . .   | 108 | 92  |
| The oscillations of the Sun and new evidence of rapid rotation of the central<br>core. V. A. Kotov, V. I. Khaneichuk, and T. T. Tsap . . . . .  | 110 | 94  |
| A general description of the summary oscillation spectrum of solar and<br>geophysical observations. V. P. Bobova . . . . .  | 114 | 98  |
| Frequency characteristics of couplings in the system formed by the Sun and the<br>Earth's magnetosphere and atmosphere. E. V. Kononovich<br>and R. V. Smirnov . . . . .                                 | 120 | 103 |
| Universal oscillations of the Sun and active galactic nuclei and an attempt<br>at interpretation. V. A. Kotov, M. G. Larionov, V. M. Lyutyi,<br>and V. I. Khaneichuk . . . . .                          | 126 | 109 |
| Excess noise and effects of solar activity in precision measurements.<br>A. V. Bruns and B. M. Vladimirskii . . . . .   | 129 | 112 |
| Development of the solar observational complex at the Tian Shan Mountain<br>Expedition of the Shternberg State Astronomical Institute [TShVE GAISH].<br>E. V. Kononovich and Yu. A. Kupryakov . . . . . | 143 | 124 |

|    |    |  |
|----|----|--|
| 10 | 15 | (magnetograph observations from the Crimea). S. I. Goparyuk . . . . .  |
| 19 | 24 | The ideas of A. B. Severynyi and the contemporary physics of flares . . . . .  |
| 22 | 28 | M. A. Livshits . . . . .   |
| 27 | 34 | Spectroscopic and monochromatic studies of a white flare of 15 June 1991 . . . . .   |
| 28 | 47 | A. N. Babkin, A. N. Koval, and M. B. Ogorodnikov . . . . .   |
| 42 | 52 | Relative time shift of intensity variations in solar radio bursts at 2.2 and 2.85 GHz. Yu. F. Yurovskii . . . . .  |
| 47 | 57 | The problem of nuclear reactions in a solar flare region. E. I. Mogilevskii . . . . .  |
| 52 | 63 | Temporal variations of photospheric physical conditions before flares. K. V. Alikasov, N. N. Kondratyeva, T. I. Redyuk, and E. G. Rudnikova . . . . .              |
| 57 | 63 | On the sequence of manifestations of a photospheric siphon. K. V. Alikasov, E. A. Baranovskii, N. N. Kondratyeva, T. I. Redyuk, and E. G. Rudnikova . . . . .      |
| 63 | 70 | Comparison of magnetic-field structures observed in FeI $\lambda 5120$ and $\lambda 5324$ Å outside of active regions. S. I. Goparyuk and T. N. Tarasova . . . . . |
| 66 | 78 | On the mechanism of millimeter-band emission from solar active regions and flares. N. S. Nestorov, I. G. Moiseev, P. S. Nikitina, and I. D. Stupka . . . . .       |
| 70 | 78 | H <sub>α</sub> emission absorption structures of active regions on the Sun's disk in the D line of helium. E. S. Kulagin . . . . .                                 |
| 77 | 80 | Cyclic variations of large-scale solar magnetic fields. V. N. Oshibko . . . . .  |
| 80 | 88 | The large-scale structure of the photospheric and coronal magnetic fields and its variations during an 11-year solar cycle. E. V. Ivanov . . . . .                 |
| 88 | 94 | The periodicity of the Sun's general magnetic field, 1958-1991. V. I. Kharinichuk . . . . .  |
| 94 | 99 | The inverse problem of magnetic-field structure in the chromosphere and corona. B. P. Filippov . . . . .   |
| 99 |    | (continued)  |
