## BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY

PAGES  
RUSSIAN/ENGLISH

Length and frequency band of type 1 solar radio bursts and decimeter flux pulsations. Yu. F. Yurovskii . . . . .	1	5	1
Certain features of two solar microwave bursts in the 8.6–15.4 GHz band. A. D. Granat . . . . .		21	15
Influence of faculae on the figure of the solar limb. L. A. Akimov, I. L. Belkina, and N. P. Dyatel . . . . .		28	21
Search for inertial pulsations of the Sun using the geomagnetic aa-index. V. P. Bobova and B. M. Vladimirskii . . . . .		31	24
Modified method of antenna beam switching and its application in solar observations. N. V. Baranov, A. D. Granat, M. A. Mironov, and L. I. Tsvetkov . . . . .		39	31
Chromospheric pulsations in 3.3 mm solar radio emission. A. G. Kislyakov, V. I. Nosov, and L. I. Tsvetkov . . . . .		47	38
Resonance properties of the solar system. A. K. Pankratov, V. Ya. Narmanskii, N. S. Chernykh, A. P. Kornienko, and B. M. Vladimirskii . . . . .		53	43
BVR- photometry of compact objects near the nuclei of the active galaxies NGC 1275, NGC 7469, Mrk 290, Mrk 298, 3C 120, and 3C 390.3. I. I. Pronik, V. V. Prokof'eva, and L. M. Sharipova . . . . .		58	48
Period $P_0$ in the oscillation power spectrum of active galactic nuclei. V. A. Kotov and V. M. Lyuty . . . . .		79	67
Periodic $P_0$ oscillations of the Sun and of ten active galactic nuclei. A possible cosmological explanation. V. A. Kotov, V. I. Khaneychuk, and V. M. Lyuty . . . . .		90	77
Variation of the relative intensity of the $V$ and $R$ components of the $H_\alpha$ and $H_\beta$ lines in the spectrum of $\gamma$ Cas. T. S. Galkina . . . . .		102	88
Search for long-term brightness variations in dKe–dMe stars. N. I. Bondar . . . . .		111	95
Polarization observations of RR Lyr. G. A. Garbuzov, V. A. Korablev, and Yu. S. Romanov . . . . .		136	118
Methods of observation with a second-generation gamma-ray telescope. A. P. Kornienko, Yu. I. Neshpor, Yu. L. Zyskin, and A. A. Stepanian . . . . .		143	125
Stellar scanning spectrometer. V. I. Burnashev, A. B. Bukach, and S. S. Guziy . . . . .		157	137
Design of spectrometers with concave diffraction gratings. I. R. E. Gershberg . . . . .		166	145

(continued)

Design of spectrometers with concave diffraction gratings. II.

R. E. Gershberg, D. N. Rachkovskii, and A. V. Terebizh . . . . .	181	160
Apochromatic lens systems. G. M. Popov and E. G. Popov . . . . .	195	174
Significant results from studies at the Crimean Astrophysical Observatory in 1995. N. I. Shakhovskaya . . . . .	202	181
K. K. Chuvaev (1917–1994) . . . . .	207	184

1998

VOLUME 93

1	2	Length and frequency band of type I solar radio bursts and decimeter lux polarization. Yu. P. Yarovskii . . . . .
12	21	Certain features of two solar microwave bursts in the 8.6–12.4 GHz band. A. D. Guran . . . . .
21	28	Influence of faculae on the figure of the solar limb. I. A. Arinova, I. I. Bekkin, and N. P. Dvornik . . . . .
29	31	Search for fainter polarizations of the Sun using the geometric an-index. V. P. Belevov and B. M. Vladimirov . . . . .
31	39	Modified method of narrow beam switching and its application in solar observations. M. V. Barsanov, A. D. Guran, M. A. Mironov, and I. I. Zvezdov . . . . .
38	47	Cometary pulsations in 3.3 mm solar radio emission. A. O. Kislyakov, V. I. Novov, and I. I. Zvezdov . . . . .
43	53	Resonance properties of the solar system. A. K. Parkiniov, V. Ya. Narmanski, N. S. Chernykh, A. P. Komisarov, and B. M. Vladimirov . . . . .
48	58	BVR photometry of compact objects near the nuclei of the active galaxies NGC 1275, NGC 3499, MR 299, MR 298, 3C 130, and 3C 390.3. I. I. Prorok, V. V. Prokofev, and L. M. Sharipova . . . . .
61	70	Period P <sub>1</sub> in the oscillation power spectrum of active galactic nuclei. V. A. Korov and V. M. Lyulya . . . . .
77	90	Periodic P <sub>2</sub> oscillations of the Sun and of ten active galactic nuclei. A possible cosmological explanation. V. A. Korov, V. I. Krasovchuk, and V. M. Lyulya . . . . .
88	102	Variation of the relative intensity of the V and R components of the H <sub>α</sub> and H <sub>β</sub> lines in the spectrum of γ Cas. T. S. Galina . . . . .
95	111	Search for long-term brightness variations in H <sub>α</sub> –H <sub>β</sub> lines. N. I. Bondar. Polarization observations of MR 179. G. A. Garbarov, V. A. Karpishov, and Yu. S. Romanov . . . . .
118	125	Methods of observation with a second-generation gamma-ray telescope. A. F. Kornilenko, Yu. I. Keshpor, Yu. I. Zvezdin, and A. A. Stepanian . . . . .
137	157	Shell scanning spectrometer. V. I. Buravskiy, A. B. Bukach, and S. S. Ostiy . . . . .
145	166	Design of spectrometers with concave diffraction gratings. I. R. E. Gershberg (continued)
