## BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY

PAGES  
RUSSIAN/ENGLISH

Part I: Papers at Plenary Sessions Devoted to the 50th  
Anniversary of the Crimean Astrophysical Observatory

Observations of active galactic nuclei at the Crimean Astrophysical Observatory. V. I. Pronik . . . . .	23	1
Determination of atmospheric parameters of red giants. A. A. Boyarchuk, M. E. Boyarchuk, L. I. Antipova, and I. S. Savanov . . . . .	36	7
Mass transfer in binary systems. A. A. Boyarchuk, D. V. Bisikalo, O. A. Kuznetsov, and V. M. Chechetkin . . . . .	44	14
Contact stage of eclipsing binaries. V. G. Karetnikov . . . . .	49	19
Study of solar flares at the Crimean Astrophysical Observatory. N. N. Stepanian . . . . .	54	23
Complexes of active regions on the sun. I. E. I. Mogilevskii and N. S. Shilova . . . . .	60	29
Complexes of active regions on the sun. II. E. I. Mogilevskii and N. S. Shilova . . . . .	72	39
Joint (Radiophysics Research Institute and Crimean Astrophysical Observatory) studies of spectral and fluctuation characteristics of solar activity phenomena in the microwave region. N. S. Kaverin, S. D. Snegirev, Yu. V. Tikhomirov, V. M. Fridman, O. A. Sheiner, M. A. Mironov, I. G. Moiseev, and L. I. Tsvetkov . . . . .	82	47
Magnetic fields of the sun and stars. S. I. Gopasyuk . . . . .	98	60
Consistency of measurements of the magnetic field of the sun as a star and its annual variation. V. A. Kotov, V. I. Khaneichuk, T. T. Tsap, and M. L. Demidov . . . . .	110	71
25 years of investigating the magnetic field of the sun as a star. V. A. Kotov, V. I. Khaneichuk, and T. T. Tsap, M. L. Demidov, and V. M. Grigor'ev . . . . .	118	79
160-minute oscillations of active galactic nuclei: new data for 3C 273 and NGC 4151. V. A. Kotov, N. I. Merkulova, L. P. Metik, V. I. Khaneichuk, and V. M. Lyutyi . . . . .	123	83
		(continued)

Part II: Papers at the First Plenum of the "Sun" Section  
of the Ukrainian Astronomical Association

Empirical models of height and surface nonuniformities of the magnetic field in solar flares. E. A. Baranovskii, V. G. Lozitskii, and N. I. Lozitskaya . . . . .	134	93
Model of chromospheric filament from observations in hydrogen and ionized calcium lines. E. V. Kononovich and A. B. Gorshkov . . . . .	136	95
Prominence emission spectrum from results of observation of the total solar eclipse on 11 July 1991. E. V. Kononovich, O. B. Smirnova, and A. E. Shchukin . . . . .	138	97
Vertical magnetic field strength gradients. S. I. Gopasyuk, O. S. Gopasyuk, T. N. Tarasova, and A. N. Shakhovskaya . . . . .	141	100
Upper limit for the amplitude of the solar 160-minute oscillation in 1982-1989. V. A. Kotov, V. I. Khaneichuk, and T. T. Tsap . . . . .	144	102
Absence of periodicity of electron acceleration during solar flares. Yu. F. Yurovskii . . . . .	152	110
Helium emission features in the D3 line in the lower and middle solar chromosphere. L. A. Akimov, I. L. Belkina, and N. P. Dyatel . . . . .	154	112
Problem of iron abundance in the solar photosphere. R. I. Kostyk, N. G. Shchukina, and R. J. Rutten . . . . .	161	118
Variations of the $\lambda 525.02$ nm Fe I line profile over the solar disk and observations of large-scale magnetic fields. M. L. Demidov . . . . .	164	121
Some results of numerical modeling of solar atmospheric oscillations. A. S. Andreev and A. G. Kosovichev . . . . .	166	123
Diagnostics of small-scale magnetic fields in the solar atmosphere: main methods, results, and problems. T. T. Tsap, V. G. Lozitskii, U. M. Leiko, V. A. Sheminova, and N. A. Gladushina . . . . .	170	126
Observations of low-degree p-modes at the Crimean Astrophysical Observatory. T. T. Tsap, V. I. Khaneichuk, and V. A. Kotov . . . . .	173	129
Solar oscillations according to CrAO 1974-1994 data. V. A. Kotov, V. I. Khaneichuk, and T. T. Tsap . . . . .	176	132
Alpha-quenching in the solar convection zone. V. N. Krivodubskij . . . . .	180	136
Turbulization of current-sheath plasma in the Heyvaerts-Priest-Rust solar flare model. Yu. T. Tsap . . . . .	185	141
Problem of the zero level of solar magnetographs and observations of large-scale magnetic fields. M. L. Demidov . . . . .	187	143
Use of digitized images for solar activity patrol observations at the Kharkov State University Astronomical Observatory. S. A. Beletskii and T. P. Bushueva . . . . .	190	146
Processing solar observation data with a magneto-optical filter: some new algorithms. L. V. Didkovskii, O. A. Andreeva, P. I. Borzyak, A. I. Dolgushin, E. Rhodes, N. Johnson, and P. Rose . . . . .	193	149
Low-order solar oscillations on the basis of recording diffuse skylight. E. V. Kononovich, Yu. A. Kupryakov, O. B. Smirnova, and V. M. Solov'ev . . . . .	202	158
Annotation of the results of the project "organization and conduction of an experiment for measuring the frequencies of low-order solar oscillations on the basis of recording diffuse skylight". E. V. Kononovich, Yu. A. Kupryakov, O. B. Smirnova, and V. M. Solov'ev . . . . .	205	161
DIFOS helioseismological experiment. R. I. Kostyk, I. G. Keselman, S. N. Osipov, Yu. D. Zhugzhda, I. M. Kopaev, N. I. Lebedev, and V. N. Oraevskii . . . . .	207	163
Numerical modeling of nonlinear processes and comparison with experimental spectra in a wide range of periods. V. P. Bobova . . . . .	208	164
Synergetic approach to the spectrum of rhythms of dynamic processes in the solar system. V. P. Bobova . . . . .	213	169

(continued)

Potentialities of astronomical observatories in ecological research. N. Lozitska and V. Lozitskij .....	217	172
--	-----	-----

Part III: Meeting of the Working Group  
"Physics of Stellar Atmospheres"

Effects in LiI resonance and subordinate lines in late-type stellar atmospheres: new results. Yakiv V. Pavlenko .....	223	177
Line formation conditions in atmospheres with external X-ray irradiation. V. V. Shimanskii and N. A. Sakhibullin .....	226	180
Results of measuring radial velocities of $\alpha$ And. A spotted Hg-Mn star? V. P. Malanushenko .....	228	182
On gallium abundance in the atmosphere of $\alpha$ Andromedae. V. G. Klochkova and A. V. Yushchenko .....	229	183
Spectral variability of magnetic star $\beta$ CrB. Yu. S. Romanov, Z. N. Fenina, and N. S. Zgonyaiko .....	231	185
Spectroscopic analysis of 31 Aql. T. V. Mishenina .....	237	190
Chemical composition of 3 giants with CN2 indices. T. V. Mishenina and S. V. Kutsenko .....	238	191
Inhomogeneity of the spectrum of the sun as a comparison star in the $\lambda$ 5400-6600 Å wavelength range. Yu. S. Romanov, Z. N. Fenina, and S. V. Vasil'eva .....	239	192
Investigation of the chemical composition of peculiar stars based on observations of the Crimean Astrophysical Observatory. V. V. Leushin ..	243	196
Phenomenon of metallicity of stars. V. V. Leushin and G. P. Topil'skaya .....	245	197
Magnetic fields of Ap stars. V. D. Bychkov .....	248	200
Ap stars in eclipsing binary systems: YZ Cas. V. D. Bychkov .....	250	202
Magnetism of white dwarfs. S. N. Fabrika, G. G. Valyavin, V. G. Shtol, and V. D. Bychkov .....	253	205
Precessional modulation of radial velocities in SS433. S. N. Fabrika, L. V. Bychkova, and A. A. Panferov .....	256	208
Investigation of the spectral variability of magnetic variable star 52 Her. O. A. Mikhnov .....	258	210
Determination of carbon abundance in the atmosphere of K giant $\gamma^1$ Leo from the CH molecular spectrum. A. V. Shavrina, L. A. Yakovina, and M. E. Boyarchuk .....	259	211
Accuracy of non-LTE investigations of potassium lines for stars of spectral classes F-G. V. V. Shimanskii .....	261	213
UBVRI photometry and polarimetry of cataclysmic variable TT Ari. Yu. S. Efimov, N. M. Shakhovskoi, I. L. Andronov, and S. V. Kolesnikov	263	215
Frequency and autocorrelation analysis of cataclysmic variables. I. L. Andronov, S. V. Kolesnikov, N. M. Shakhovskoi .....	267	219
Scientific archive of spectrograms of the Crimean Astrophysical Observatory. N. S. Polosukhina, V. P. Malanushenko, T. S. Galkina, and N. I. Yavorskaya .....	273	224
A new method of testing secondary mirrors of large telescopes. G. M. Popov .....	276	227

Part IV: Spectrophotometry Meeting Devoted  
to the Memory of Professor V. B. Nikonov

Vladimir Borisovich Nikonov (Personal recollections). P. P. Dobronravin .....	282	233
V. B. Nikonov's pioneer works with image tubes and television at the Crimean Astrophysical Observatory. V. V. Prokof'eva .....	285	235
Spectrophotometry of stars 9-12 <sup>m</sup> north polar spectrophotometric sequence (NPSS) program. L. M. Sharipova and V. V. Prokof'eva .....	289	238

(continued)

Spectrophotometric standards of 7-8 mag. V. V. Biryukov, G. V. Borisov, I. N. Glushneva, and V. I. Shenavrin . . . . .	298	246
Comparison of the energy distribution and synthetic color indices of Vega with the average values for spectral subclass AOV. I. N. Glushneva . . . . .	299	247
Secondary spectrophotometric standards: energy distribution and physical parameters of atmospheres. I. N. Glushneva and V. I. Shenavrin . . . . .	301	249
Normal energy distribution in stellar spectra. L. N. Knyazeva and A. V. Kharitonov . . . . .	302	251
Energy distribution in spectra of selected stars in a wide range (information about work being carried out). L. N. Knyazeva and A. V. Kharitonov . . . . .	304	253
Pulkovo spectrophotometric bright star catalogue in the range 0.32-1.08 $\mu\text{m}$ . G. A. Alekseeva, A. A. Arkharov, V. Bogoroditskaya, V. D. Galkin, E. I. Gagen-Torn, O. A. Kletskii, V. V. Novikov, I. N. Nikanorova, V. P. Pakhomov, T. Yu. Puzakova, E. V. Ruban, I. I. Rumyantsev, I. B. Sal'nikov, and A. Sokolov . . . . .	305	254
Temperature sequence of continuous spectra of stars. A. A. Arkharov, T. Yu. Puzakova, and E. V. Ruban . . . . .	307	256

Part IV: Spectrophotometry Measuring Devices  
to the Memory of Professor Y. B. Nikonov

Vladimir Borisovich Nikonov (Personal recollections). P. P. Dobronravov . . . . .	333	333
V. B. Nikonov's papers with image tubes and television at the Crimean Astronomical Observatory. V. V. Pichor'eva . . . . .	335	335
Spectrophotometry of stars 9-12 <sup>m</sup> north polar spectrophotometric sequences (PSPS) program. I. M. Shapovalov and V. V. Pichor'eva . . . . .	338	338

(continued)
