PAGES
RUSSIAN/ENGLISH

Chronology of symbiotic Nova PU Vul development. R. E. Gershberg	4	1
Investigation of Kuwano-Honda peculiar object (PU Vul). III. T. S. Belyakina, V. I. Burnashev, R. E. Gershberg, Yu. S. Efimov, N. M. Shakhovskoi, and V. I. Sheravrin	22	18
Quantitative analysis of ultraviolet, optical, and infrared emission spectra of celestial bodies to determine physical parameters and chemical composition of radiating diffuse matter and interstellar absorption up to it. V. V. Golobatyi, R. E. Gershberg, Yu. F. Mal'kov, and V. I. Pronik	72	64
Distribution of frequency and duration of type I solar radio bursts. Yu. F. Yurovskii	139	124
"Scintillation" of the intensity of radio emission of solar noise storms. Yu. F. Yurovskii	157	139
Electron acceleration mechanisms in solar flares. Yu. T. Tsap	165	146
Variations of the sun's general magnetic field: rotation and 22-year cycle. V. I. Haneychuk	176	156
Solar oscillations in 1999. V. A. Kotov, V. I. Haneychuk, and T. T. Tsap	188	166
Solar universal spectrophotometer. N. N. Stepanian, E. V. Dolgoplova, A. I. Elizarov, E. V. Malanushenko, K. V. Parchevskii, and G. A. Sunitsa	194	171
