1

Coronal hole evaluation at various heights in the solar atmosphere. N. N. Stepanyan and V. M. Malashchuk	8	1
Origin of the crossover effect in sunspot spectra. M. J. Guseinov	17	9
Thermal and nonthermal processes in the energy release in the flux of 15 June 1991. A. N. Babin and A. N. Koval	27	16
Flare chromosphere modeling. E. A. Baranovskii, A. V. Shumko, and U. S. Bayazitov	40	26
The active core of Seyfert galaxy NGC 4151 and the true origin of the 160-minute oscillation. V. A. Kotov, V. I. Khaneichuk, N. I. Merkulova, L. P. Metik, and V. M. Lyutyi	47	32
Radio observations on the solar eclipse of 11 August 1999 at wavelengths of 10.7 cm and 1.07 m. Yu. F. Yurovskii	60	43
Time shifts of fluctuations in radio emission from solar noise storms at 280 and 300 MHz. Yu. F. Yurovskii	70	52
Radio depressions in a two-component solar model: observations with the RT-22 at the Crimean Astrophysical Observatory in 1990-1998. I. A. Budzinovskaya and L. I. Tsvetkov	78	58
Microwave emission in the event of 14 July 2000. Yu. G. Kopylova, Yu. T. Tsap, and L. I. Tsvetkov	84	63
Dynamic links between the Sun and the planetary system: effects in the 20-22 year and 180 year solar activity cycles. G. Ya. Vasil'eva and M. M. Nesterov	91	68
Major results from the Crimean minor planet photographic survey. N. S. Chernykh and L. I. Chernykh	98	74
Satellite systems as the key to asteroid evolution. L. G. Karachkina and V. V. Prokof'eva	109	83
CCD photometry of RV-Tau type stars. Part 1. TT Ophiuchi. V. I. Burnashev, B. A. Burnasheva, and E. A. Vitrichenko	123	95
Spectrophotometric observations on asteroids at the Crimean Astrophysical Observatory. V. V. Bochkov, V. V. Prokof'eva, and A. N. Abramenko	136	107
The new RT-22 control system. N. S. Nesterov and P. S. Nikitin	150	119
A polarimetric detector for automated observations on maser sources in the 1.35 cm water vapor line. A. E. Vol'vach, I. D. Strepka, N. S. Nesterov, and P. S. Nikitin	157	125
Matching telescope optics to a CCD detector. G. M. Popov	162	129
