VOLUME 99

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY

	PAGES	
	RUSSIAN/ENGLISH	
The contribution of Academician Grigori Abramovich Shain to ideas on the formation of stars from interstellar matter. I. I. Pronik and L. M. Sharipova	5	1
CAO observations on ultrahigh-energy gamma rays from the active nucleus of galaxy Mk 501. Yu. I. Neshpor, N. A. Zhogolev, O. R. Kalekin, Z. N. Skiruta, A. A. Stepanyan, V. P. Fomin, and V. G. Shitov	34	27
BL Lac galaxy as a variable source of ultrahigh-energy gamma rays. Yu. I. Neshpor, A. A. Stepanyan, V. S. Eliseev, N. A. Zhogolev, O. R. Kalekin, E. M. Nekhai, Z. N. Skiruta, V. V. Fidelis, V. P. Fomin, and V. G. Shitov	43	34
Crimean observatory data on ultrahigh-energy gamma rays from the Geminga pulsar. Yu. I. Neshpor	49	39
Observations during 2002 with the GT-48 gamma telescope. Yu. I. Neshpor, V. S. Eliseev, N. A. Zhogolev, E. M. Nekhai, Z. N. Skiruta, V. V. Fidelis, and V. P. Fomin	60	49
Periodic oscillations on the Sun and in the luminosity of four active galactic nuclei. V. A. Kotov and V. M. Lyutyi	65	53
A phase anomaly in the periodic luminosity oscillation of the NGC 4151 nucleus. V. A. Kotov, V. I. Khaneichuk, and V. M. Lyutyi	77	63
Rapid changes in sunspot magnetic fields during flares. A. N. Babin and A. N. Koval	86	71
Determining burst duration in solar noise storms from power spectra. Yu. F. Yurovskii	92	76
Plasma motion in the magnetic field of a sunspot umbra in the region of the photosphere temperature minimum. O. S. Gopasyuk and S. I. Gopasyuk	101	83
Magnetic fields and currents in active region chromosphere. S. I. Gopasyuk and O. S. Gopasyuk	108	89
Low-frequency wave generation in after-flare loop plasma in the presence of marked temperature inhomogeneity. A. N. Krishtal and S. V. Gerasimenko	119	98
Solar neutrino intensity variations as a problem in physical chemistry: experiments with the GALLEX-SAGE gallium-germanium system. B. M. Vladimirkii and A. V. Bruns	132	110
On the practicability of VLF ionosphere sounding in the seismo-active regions on the basis of RNS. V. Fidelis	143	119

(continued)

Examination of the wavefront in a convergent beam with a Hartmann diaphragm. V. V. Biryukov and V. Yu. Terebizh	152	127
Efficient filtration in inverse treatments. V. Yu. Terebizh	166	139
Light-emitting diodes as calibrated light sources in astrophotometry and spectrophotometry. A. N. Abramenko and A. V. Taran	181	152
Some relations between L/L_{\odot} , T_e/T_{\odot} , M/M_{\odot} and R/R_{\odot} for stars of various types. M. A. Bazhenov	189	159
The main scientific results obtained at the Crimean Astrophysical Observatory in 2002. N. I. Shakhovskaya	195	164

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY

PAGES
RUSSIAN/ENGLISH

1	2	The contribution of Acetone to the formation of stars from interstellar matter. I. I. Pionik and I. M. Sharipova
17	24	GAO observations on ultrahigh-energy gamma rays from the active nucleus of galaxy Mrk 501. Yu. I. Neshpor, N. A. Zhegolev, O. R. Kaldin, Z. N. Skirna, A. A. Sapsanov, V. P. Fomin, and V. G. Shitov
31	43	BL Lac galaxy as a variable source of ultrahigh-energy gamma rays. Yu. I. Neshpor, A. A. Sapsanov, V. S. Elisseev, N. A. Zhegolev, O. R. Kaldin, E. M. Nektal, Z. N. Skirna, V. V. Fideles, V. P. Fomin, and V. G. Shitov
39	49	Crimean observatory data on ultrahigh-energy gamma rays from the Geminga pulsar. Yu. I. Neshpor
49	60	Observations during 2002 with the GT-48 gamma telescope. Yu. I. Neshpor, V. S. Elisseev, N. A. Zhegolev, E. M. Nektal, Z. N. Skirna, V. V. Fideles, and V. P. Fomin
73	82	Periodic oscillations on the Sun and in the luminosity of four active galactic nuclei. V. A. Kozlov and V. M. Lyuyiy
83	77	A phase anomaly in the periodic luminosity oscillation of the NGC 4151 nucleus. V. A. Kozlov, V. I. Kharachuk, and V. M. Lyuyiy
71	86	Rapid changes in coronal magnetic fields during flares. A. N. Babin and A. N. Koval
76	92	Determining burst duration in solar noise storms from power spectra. Yu. F. Yurovskii
89	101	Plasma motion in the magnetic field of a sunspot umbra in the region of the photosphere temperature minimum. O. S. Gopasyuk and S. I. Gopasyuk
89	108	Magnetic fields and currents in active region chromospheres. S. I. Gopasyuk and O. S. Gopasyuk
98	119	Low-frequency wave generation in after-flare loop plasmas in the presence of marked isentropic inhomogeneity. A. N. Kitchul and S. V. Gerasimenko
110	132	Solar neutron intensity variations as a problem in physical chemistry: experiments with the CALLEX-SAGE gallium-germanium system. R. M. Vasilinskii and A. V. Bruns
119	143	On the practicability of VLF ionospheric sounding in the seismo-active regions on the basis of RMS. V. Fideles
