VOLUME 100

BULLETIN OF THE CRIMEAN ASTROPHYSICAL OBSERVATORY

	PAGES	
	RUSSIAN/ENGLISH	
Effects of magnetic field inclination in simple sunspots. O. S. Gopasyuk	8	1
Plasma acceleration above a sunspot umbra. O. S. Gopasyuk and S. I. Gopasyuk . .	16	8
The small-scale magnetic field structure in active regions. S. I. Gopasyuk and O. S. Gopasyuk	22	13
Low-frequency oscillations in the solar photosphere: ground data and some SOHO satellite measurements. V. A. Kotov and V. I. Khaneichuk	30	20
Semiempirical models for the photosphere in a solar flare-active region. N. N. Kondrashova and M. N. Pasechnik	45	33
Long-period variations in solar-spectrum Fraunhofer line parameters. M. M. Koval'chuk and M. B. Girnyak	49	36
The Sun's general magnetic field: rotation in magnetic structures opposite in polarity. U. M. Leiko	55	41
A radiometer with two-bit ADC for examining solar radio bursts with the URAN-4 radio telescope. I. O. Litvinenko, R. O. Kravets, and A. V. Derevyagin	61	45
Fractals and a possible soliton flare model. E. I. Mogilevskii and N. S. Shilova	66	49
Numerical 3D simulation of acoustic wave scattering by a sunspot. K. V. Parchevsky	74	55
Simulation of 2D compressible solar convection and the evolution of large-scale dynamic structures. K. V. Parchevskii	86	66
Wolf-number recovery of the heliospheric current layer inclination with respect to the solar equator. N. I. Pishkalo	100	78
Occurrence of the 160-min variation in riometer absorption. S. N. Samsonov, V. D. Sokolov, and N. G. Skryabin	105	82
Solar features studied from the ground and on the CORONAS-F satellite. Part 1. Observation methods and analysis of solar images in various spectral ranges. O. I. Bugaenko, V. V. Grechnev, V. P. Maksimov, G. V. Rudenko, R. K. Zhigalkin, N. N. Stepanyan, I. A. Zhitnik, A. P. Ignat'ev, S. V. Kuzin, A. A. Pertsov, V. S. Slemzin, I. M. Livshits, V. N. Obridko, and A. F. Kharshiladze	110	86

(continued)

Solar features studied from the ground and on the CORONAS-F satellite.

Part 2. Magnetic fields at various heights in coronal holes.

O. I. Bugaenko, G. V. Rudenko, V. G. Fainshtein, V. M. Malashchuk,
N. N. Stepanyan, N. I. Shtertser, I. A. Zhitnik, A. P. Ignat'ev,
S. V. Kuzin, A. A. Pertsov, V. S. Slemzin, and V. N. Obridko

123 97

Solar features studied from the ground and on the CORONAS-F satellite.

Part 3. Coronal hole boundaries in relation to active features.

O. I. Bugaenko, G. V. Rudenko, V. G. Fainshtein, V. M. Malashchuk,
N. N. Stepanyan, N. I. Shtertser, I. A. Zhitnik, A. P. Ignat'ev,
S. V. Kuzin, A. A. Pertsov, V. S. Slemzin, and V. N. Obridko

136 107

Microturbulence in solar granulation. M. I. Stodilka and M. M. Koval'chuk

152 121

Height dependence of coronal brightness from SOHO/EIT-171 Å telescope
observations in 1996-2002. A. G. Tlatov and V. I. Makarov

158 126

Origin of the global solar minima: solar system dynamic structure revealed by
solar eclipses visible in Russia (1000-2050). G. Ya. Vasil'eva,
L. I. Rummyantseva, M. V. Lukashova, and M. N. Nesterov

163 131

Roles of the Sun and planetary system in generating the 20-year cycle.

G. Ya. Vasil'eva, L. I. Rummyantseva, and M. N. Nesterov

171 138

1 8 Effects of magnetic field inclination in simple sunspot O. S. Goparyuk
8 16 Plasma reconnection above a sunspot umbra O. S. Goparyuk and S. I. Goparyuk
13 22 The small-scale magnetic field structure in active regions S. I. Goparyuk
and O. S. Goparyuk
20 30 Low-frequency oscillations in the solar photosphere: ground data and solar
SOHO-stellar measurements V. A. Kozlov and V. I. Kharin
23 42 Semiquantitative models for the photosphere in a solar flare-active region
M. N. Kharin and M. N. Parshvati
26 40 Long period variations in solar spectrum Fraunhofer line parameters
M. M. Koval'chuk and M. B. Gulyak
41 52 The Sun's general magnetic field: rotation in magnetic structures opposite in
polarity U. M. Lello
A radiometer with two-bit ADC for examining solar radio bursts with the URAN-
radio telescope I. O. Livanov, R. O. Kharin,
and A. V. Deryagin
43 61 Flares and a possible solution flare model E. I. Mogilevskii
and N. S. Salova
49 66 Numerical 3D simulation of acoustic wave scattering by a sunspot
K. V. Parshvati
53 74 Stimulation of 3D compressible solar convection and the evolution of large-scale
dynamic structures K. V. Parshvati
56 86 Wolf-number recovery of the heliospheric current layer inclination with
respect to the solar equator N. I. Pristavko
78 100 Occurrence of the 180-min variation in ionomer absorption S. W. Samonov
82 102 V. D. Sokolov and N. G. Sklyabin
Solar features studied from the ground and on the CORONAS-F satellite
Part I. Observation methods and analysis of solar images in various
spectral ranges O. I. Bugaenko, V. V. Gulyak, V. P. Matznev,
D. V. Rudenko, R. N. Zhigalkin, N. N. Stepanyan, I. A. Zhitnik,
A. P. Ignat'ev, S. V. Kuzin, A. A. Pertsov, V. S. Slemzin,
I. M. Leshchik, V. N. Obridko, and A. F. Kharin
